Mozilla Firefox – 4 Easy Steps to Change Your Home Page

In this document you will find instructions on how to change your home page from our old link (http://www.beasleybiz.com/index.php/useful-links) to our updated page (http://www.beasleybiz.com/useful-links.html). It is important that you do this soon as we will be deleting the old link in 2 months on 7/4/2017. At that time your browser will open to an error page if you do not follow these directions. As a side note if you no longer wish to use our Useful Links as your home page then you can substitute any website URL (i.e. http://www.google.com) in place of http://www.beasleybiz.com/useful-links.html following these same directions.

Press Ctrl + P to print this page

1. Open your Firefox browser and in the address bar type in http://www.beasleybiz.com/useful-links.html (This is called a U.R.L.) then press enter.
2. Click on the settings icon in the upper right side that looks like three stacked lines.
3. Scroll down to Startup and click the button that says Use Current Page.
4. Close the settings tab by clicking on the x.
